App Screen after Changing to English Settings

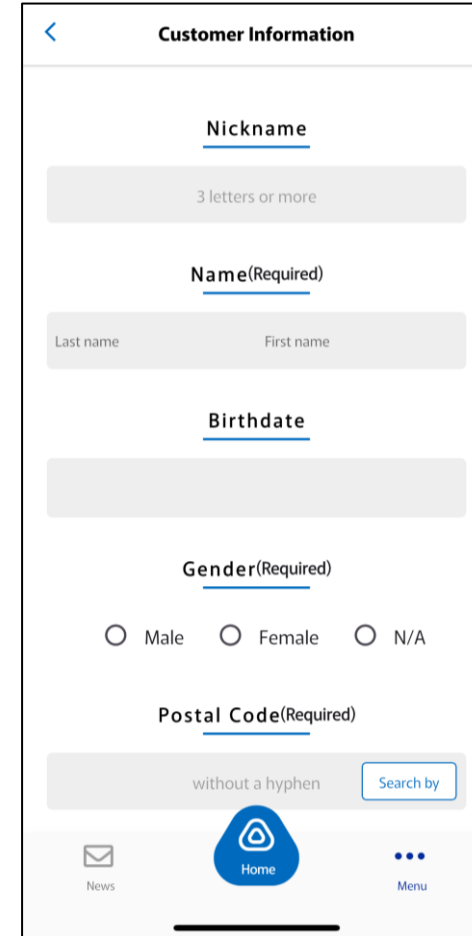

■Home screen

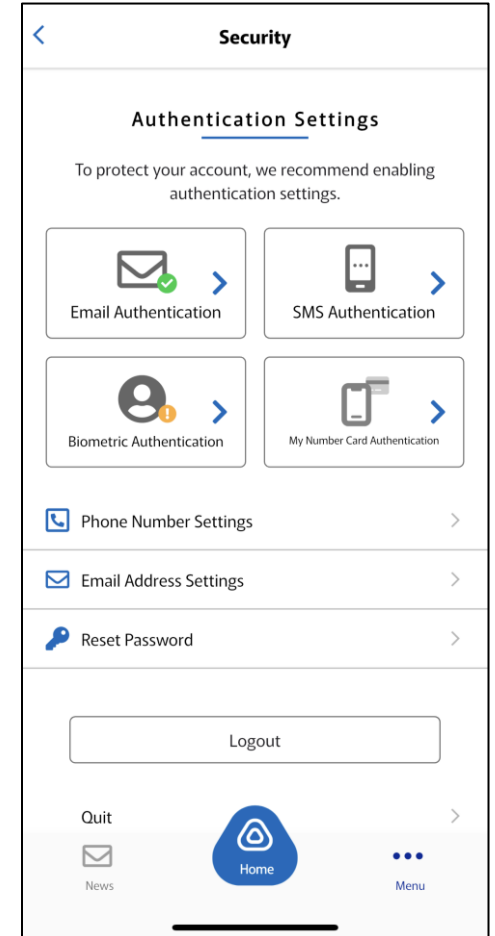

■Menu screen

■Customer Information screen

■Security settings

*Mini-app names and terms-related text will not change (remain in Japanese).

*The above image uses a development screen from an iOS device and may differ from the actual screen.

Q. Can I select the language within the app?

A. There is no separate language switching menu within this app.
Therefore, language settings must be configured on the device itself.

Q. After changing the device settings, how do I change the app's language?

A. After configuring the language settings on the device, reopen the app.
It will automatically restart, and the language setting will be applied.

Q. The language display does not change.

A. If the display does not change, please try restarting the device.
